In "A Calculated Life" by Anne Charnock. For the sake of argument let me be devil's advocate. The scientific materialist assumption is that the body is the primary organ and consciousness is secondary. This is not so; consciousness is the primary experience and the body and all other experiences are secondary.

What is the Half-life of a Drug? The half-life of a drug is an estimate of the period of time that it takes for the concentration or amount in the body of that drug to be reduced by exactly one half (50%). The symbol for half-life is  $T_{1/2}$ . For example, if 100mg of a drug with a half-life of 60 minutes is taken, the following is estimated:
