The latest h-index of Nature Biomedical Engineering is 23. The h-index is defined as the maximum value of h such that the given author/journal has published h papers that have each been cited at least h times. This index can be widely applied to the productivity and impact of a scholarly journal, individual researcher or a group of scientists, such as a department or university or country.

The School of Biomedical Engineering was established in 2019 to facilitate collaborative research excellence in the field of biomedical engineering. Through our academic staff and students, our research will aim to serve the public as a thought-leader and provide innovative technology for industry, hospitals, governments and the wider community.

Biomedical Engineering. Welcome! Biomedical engineering is a very broad, interdisciplinary field that combines the application of engineering, the physical sciences and computer science to medicine and the life sciences. We are the first Biomedical Engineering Department in Canada, and uphold a tradition of leadership and excellence.
