The Political Brain The Role

The Political Brain is a groundbreaking investigation into the role of emotion in determining the political life of the nation. For two decades Drew Westen, professor of psychology and psychiatry at Emory University, has explored a theory of the mind that differs substantially from the more "dispassionate" notions held by most cognitive psychologists, political scientists,

The Political Brain: The Role of Emotion in Deciding the ...

Westen would surely concur with Damasio that the brain's central biological function is to process emotions. Westen extends his fMRI research to many other salient observations about "the political brain," for example, how voters process the barrage of information about candidates and issues during a campaign.
