Water Conservation Research Paper

Water Conservation. Water conservation encompasses the policies, strategies and activities to manage fresh water as a sustainable resource, to protect the water environment, and to meet current and future human demand. Population, household size and growth and affluence all affect how much water is used. Conserving water can also extend the life of your septic system by reducing soil saturation, and reducing any pollution due to leaks.

Water Conservation | List of High Impact Articles | PPTs ...

Research Paper on Water Conservation. Water conservation is a set of measures to reduce water consumption and improve the efficiency of wastewater treatment in order to ensure resource conservation, environmental protection, and economic efficiency improving in industry, housing, and agriculture.
